

Landing Page with three routes in  
NavBar : Home , Login and SignUp

Sign Up Page  
After signup , User table is gets  
the credentials of User

User is logged in if correct credentials are entered and an E-Mail is sent to him if he is logging in for the first time .

After login , if the user was redirected from a referral link then UserEntry table gets the referrer otherwise the referrer is NULL

## 10 Minute Mail

### Free Temporary Email

#### Why would you use this?

Maybe you want to sign up for a site which requires that you provide an e-mail address to send validation e-mail to. And maybe you don't want to give up your real e-mail address and end up on a bunch of spam lists. This is nice and disposable. And it's free. Enjoy!
